TASK 2 · REDESIGN · MOBILE, FULL PAGE

See it, check it fits, buy it

1 Image first, slim header
The image card sits right under a five-icon header, with Compare, Save and Share below it. The search bar, ticker, tabs, call bubble and B2B bar are gone.
Solves problems **1** · **2**

2 Answer "will it fit?" under the title
"Works with M12 · M18 · 12V/24V DC" chips, a "charger only" note above the buttons, and one clean set of highlights.
Solves problem **3**

3 One clear pair of actions
Blue Add to cart and orange Buy Now, as in the original concept. A sticky bar keeps Add to cart in reach and turns into "Go to cart".
Solves problem **4**

4 Cost and arrival up front
A plain dark price next to the quantity, an honest bulk-saving line, and "Delivered by Tuesday, Nov 3" with an editable ZIP.
Solves problem **5**

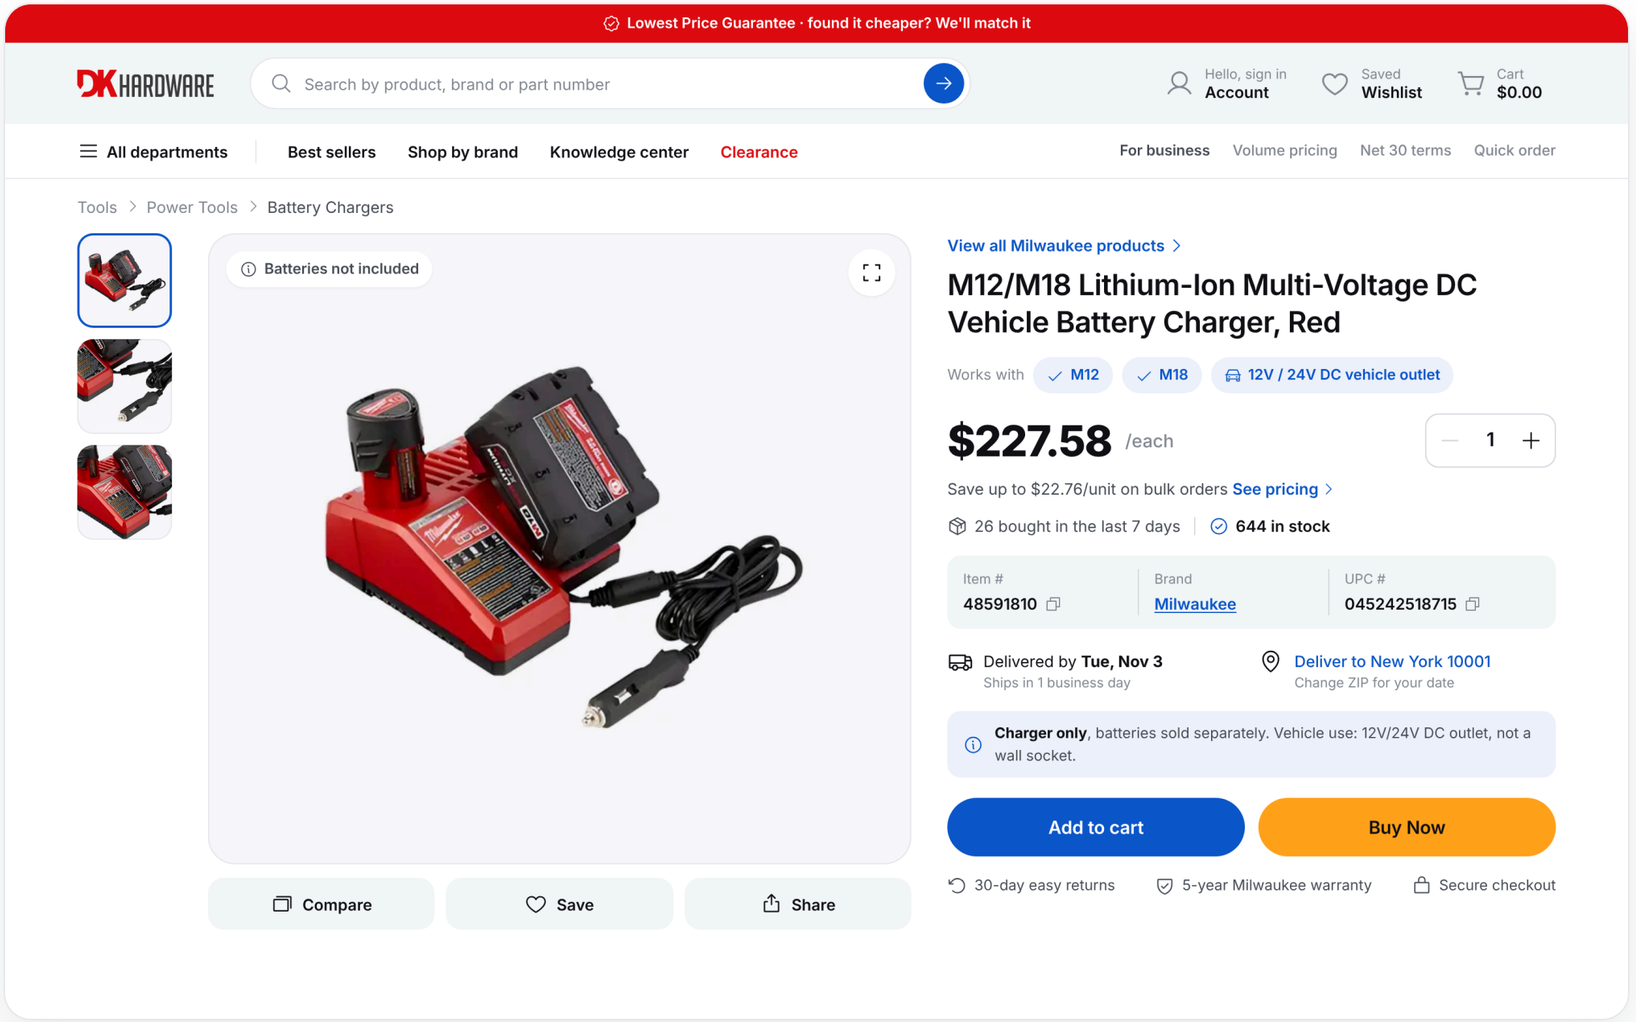

5 Only honest proof, one brand
Real demand and stock, product reviews and the store rating labelled apart, and Milwaukee as the only brand on the page.
Solves problems **6** · **7**

6 One system
Phosphor icons, Inter, grey info boxes and pill buttons. DK red only for the brand, the promo line and saved states.
Solves problem **8**

Real content only: product photo, title, price, specs and offers from the live page

TASK 2 · REDESIGN · DESKTOP, ABOVE THE FOLD (1440 × 900)

The same page on desktop, in one view

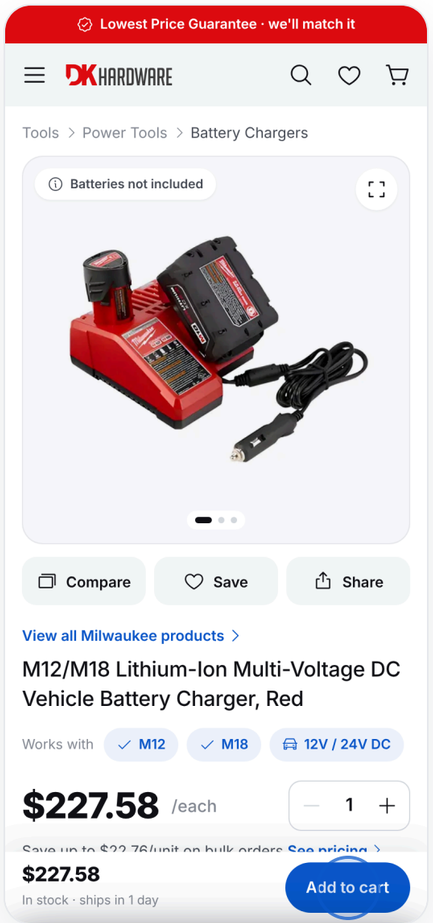

TASK 1 PROBLEM → WHAT CHANGED

1. **Crowded header and bars**
   One header, one nav row; B2B links grouped at its end
2. **Image not first**
   Large image card with thumbnails shares the first view with the buy box
3. **Fit unclear**
   "Works with" chips under the title, "charger only" note
4. **Competing actions**
   Add to cart and Buy Now side by side, nothing louder
5. **Cost and delivery**
   Plain price + quantity, bulk line, delivery date and ZIP
6. **Misleading reviews**
   Real demand, stock, returns and warranty instead of borrowed stars
7. **Category and brand**
   Tools › Power Tools › Battery Chargers; Milwaukee only
8. **Inconsistency**
   One icon family, one button system

TASK 2 · BONUS · ADD-TO-CART PROTOTYPE

From product to checkout in three taps

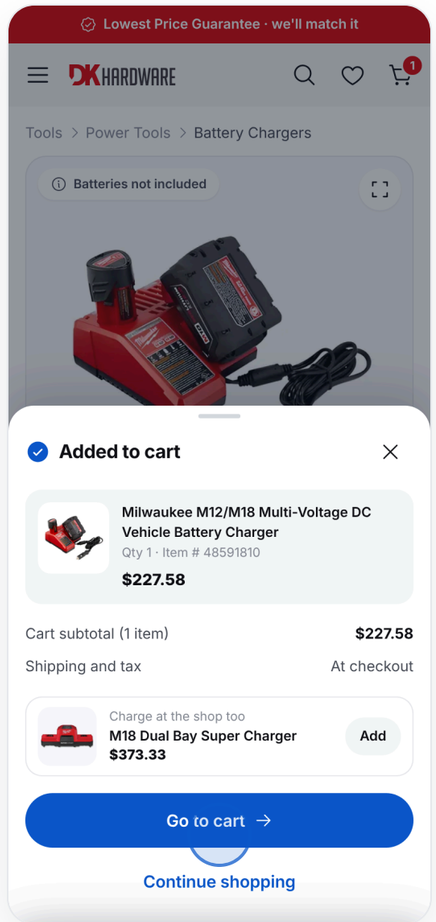

1

Land and tap Add to cart

Photo first; the sticky bar keeps Add to cart one tap away.

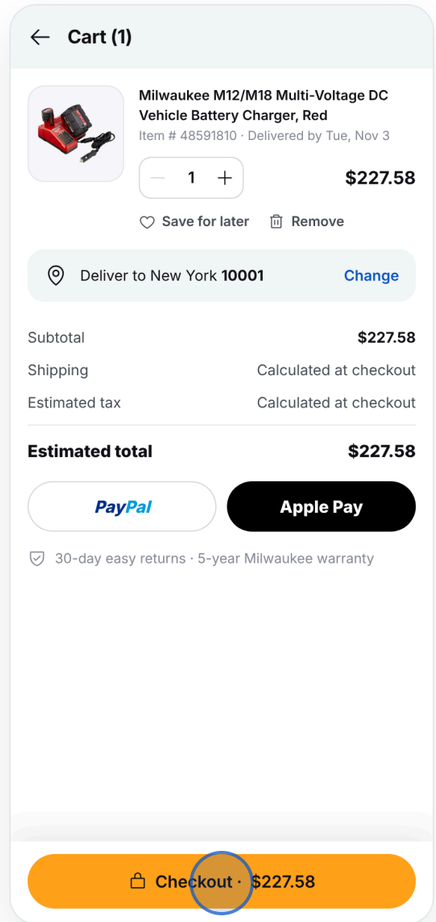

2

Confirm and go to cart

Item, subtotal and one relevant add-on; the cart badge updates.

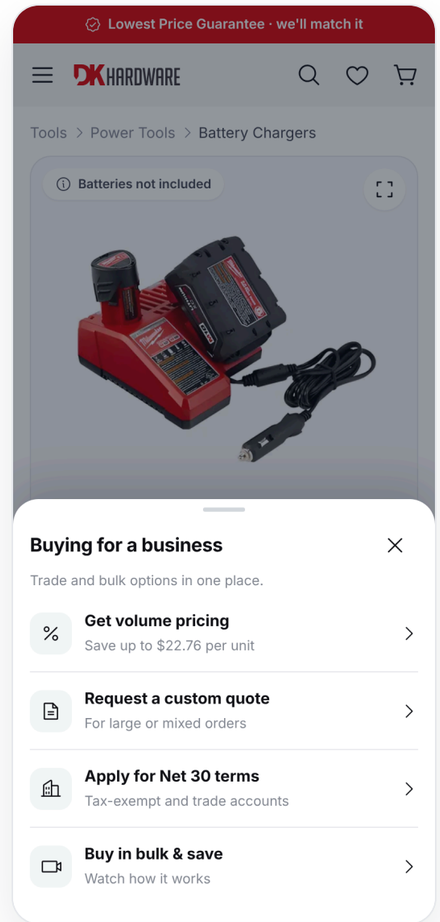

3

Review and check out

Quantity, save for later, ZIP, totals, PayPal / Apple Pay.

4

Business buyers branch off

Volume pricing, quotes, Net 30 and bulk in one sheet, away from everyday buyers.

Try it: open **redesign/mobile.html**. Buy Now skips step 2. Quantity, ZIP, wishlist, copy, image viewer and remove from cart all work.
